

Shrey Modi

Commercial / FP&A Analyst | Budget Variance, Forecasting & P&L Analysis | Power BI, SQL & Advanced Excel

Toronto, Canada (relocating to Ireland) | +1 (905) 783-9118 | shreymodi0711@gmail.com | linkedin.com/in/shreymodi786

Nationality: Indian | Work eligibility: Eligible for employment permit sponsorship | Available: Immediately

PROFESSIONAL SUMMARY

Commercially focused analyst with nearly 2 years of experience turning financial and operational data into decisions: budget-variance analysis, CPI/PF productivity tracking, forecasting, and cost-benefit business cases for senior leadership across a portfolio of industrial projects. Delivered an executive Power BI reporting ecosystem used by 20+ leaders and automated SQL reporting that saved 5-10 hours weekly, combining strong commercial acumen with advanced Excel (Power Query, pivot tables), SQL, and dashboard automation.

CORE SKILLS

Data & Analytics: Data Governance and Mining, Master Data Management, KPI Definition & Frameworks, Budget Variance Analysis, Scenario & Predictive Modeling, Statistical Analysis, Google Analytics, A/B Testing, Redshift, Oracle, t-test, Data Visualization

BI & Technical: Power BI (advanced DAX, semantic modeling, RLS), Tableau, SQL (SQL Server, PostgreSQL), Python (Pandas, NumPy, Scikit-learn), R, ETL/ELT pipelines, Databricks, REST API integration, CI/CD (GitHub Actions), Docker

Stakeholder & Delivery: C-level stakeholder management, Business case & Cost-benefit analysis, Target Operating Model design, change management, Agile/Scrum/SAFe, backlog management, UAT planning & execution

Business Analysis & Requirements: Requirements elicitation (JAD, workshops), As-Is/To-Be process mapping, Gap analysis, BRD/FRD, User stories & Acceptance criteria, RTM, BPMN/UML modeling

Tools & Platforms: SAP Business One, Jira, Confluence, MS Visio, Advanced Excel (Power Query, Pivot Tables), Azure, AWS (Lambda, EC2, S3, ECS), Power Apps, Power Automate, SharePoint, Git/GitHub

PROFESSIONAL EXPERIENCE

Business Analyst | Brock Canada, Nisku, AB, Canada

Feb 2025 - May 2026

- Defined project KPI frameworks and performed budget-variance analysis, forecasting, and CPI/PF productivity analysis, enabling teams to identify performance risk earlier and improve forecast reliability.
- Gathered requirements from Finance, Operations, and Project Management stakeholders and translated them into BRD/FRD specifications, delivering an executive Power BI reporting ecosystem used by 20+ senior leaders for real-time visibility into project KPIs, financial performance, and labor productivity.
- Built a predictive project analytics application that forecasted lump-sum project overruns and identified early risk indicators, improving forecast accuracy and supporting proactive cost-control decisions.
- Automated SQL-based reporting and SAP B1 extraction workflows, reducing reporting turnaround by 15% and saving 5-10 hours of manual effort per week.
- Designed and maintained Power BI semantic models integrating SAP Business One labor, cost, contract, and progress data from field, improving reporting accuracy by 30% and establishing a single source of truth for business decision-making.
- Developed Power Apps solutions for timesheet entry and labor tracking, reducing data-entry errors by 20% and improving field-to-office reporting efficiency.

Data Analyst (Contract) | Red Wireless, Saskatoon, SK, Canada

Nov 2024 - Dec 2024

- Built and automated interactive KPI dashboards for marketing and operations teams, reducing manual reporting effort by 50% and improving visibility into customer behavior and campaign performance.
- Performed data cleansing, transformation, and validation in SQL and Python, improving data accuracy by 25% and ensuring reliable datasets for stakeholder reporting.
- Integrated third-party APIs with Google Sheets via JavaScript, eliminating manual extraction and reducing reporting turnaround by 80% for near real-time access to business metrics.

MLOps Engineer Intern | Vosyn, Etobicoke, ON, Canada

May 2024 - Oct 2024

- Enhanced CI/CD pipelines using GitHub Actions and Docker, reducing build times by 40% and deployment failures by 30%, improving reliability of data and machine-learning workflows.
- Provisioned AWS infrastructure (Lambda, EC2, S3, ECR, ECS) to support scalable data-processing and machine-learning workloads against a 99.9% uptime target.
- Optimized Python-based data-processing pipelines, increasing throughput by 50% and reducing latency by 25%, and documented data flows and integration points to support analytics and model development.

PROJECTS

Mental Health Apprehension Analytics | AI & Data Analyst Project - Toronto Public Data Aug 2024

- Built an end-to-end ETL and analytics pipeline on AWS/HDFS to ingest, clean, and analyze Toronto Police public datasets at scale, reducing manual preprocessing effort by ~60%.
- Developed a forecasting model to predict apprehension locations and behavior patterns, delivered via a Streamlit web application for stakeholder decision support.

JupyterHub Sandbox Administration System | Cloud/Data Platform Project - Georgian College Aug 2023

- Deployed and administered a multi-user JupyterHub environment with scheduled CPU/GPU access, configuring secure role-based access and environment isolation.

EDUCATION

Postgraduate Certificate in Big Data Analytics Jan 2024 - Aug 2024

Georgian College, Barrie, ON | 4.00/4.00 GPA | Dean's List

Postgraduate Certificate in Artificial Intelligence Jan 2023 - Aug 2023

Georgian College, Barrie, ON | 4.00/4.00 GPA | Dean's List

BEng in Computer Engineering Jun 2018 - Jun 2022

KSV University, Gandhinagar, India | 3.7/4.00 GPA

CERTIFICATIONS & AWARDS

Certifications: Microsoft Azure Data Fundamentals (DP-900) | Azure Machine Learning | AWS Academy Machine Learning for NLP | AWS Academy Cloud Architecting | Advanced Power BI: DAX Language, Formulas, and Calculations | Stanford Supervised Machine Learning

Awards: Most Valuable Team Player Award (Brock Canada) | Dean's List x2 (Georgian College)

Languages: English (Native, C2) | Hindi (C1) | Gujarati (C1)
